SEALFIX String

- SEALFIX strings for temporary repairs of tread punctures
- We recommend demounting the tyre from the rim in order to determine the actual damage size
- Observe local rules and guidelines for the repair of tyres
- Permanent repairs should be performed from the inside of the tyre, for example with MINICOMBI
- For safety reasons, we also warn you not to carry out a sidewall repair with SEALFIX
- Please use it with SPECIAL CEMENT SC-BL
